

Carbon Reduction Plan

Supplier name: The TPS Healthcare Group Limited

Publication date: July 2023

Commitment to achieving Net Zero

As part of our Environment, Health & Safety Policy published annually, DCC Vital including The TPS Healthcare Group Limited, is committed to ensure environmental impacts are minimised. We will reduce pollution arising from our operations and we will seek to continually improve our environmental performance through sustainable initiatives.

The TPS Healthcare Group Limited is committed to achieving Net Zero emissions by 2045.

Baseline Emissions Footprint¹

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: FY19	
Additional Details relating to the Baseline Emissions calculations.	
The TPS Healthcare Group Limited (TPS Healthcare) is part of DCC Vital and has been measuring Scope 1 and Scope 2 emissions since Financial Year 2019 (FY19). FY19 has been set as the baseline. DCC Vital uses the Accuvio IT platform to report Scope 1 and 2 energy data from every business, including TPS Healthcare. The Accuvio system then calculates and provides reports on carbon emissions from the energy data using international standards (Greenhouse Gas Protocol) and agreed emissions factors. This process is subject to audit annually and is collated at the parent company DCC plc. for inclusion in the Annual Report. Scope 3 emissions were not recorded in FY19.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	1,308.85
Scope 2	100.36
Scope 3 ¹ (Included Sources)	N/A - not measured at that time
Total Emissions	1,409.21 tCO₂e (Scope 1 & 2 only)

¹ Note: the baseline and Scope 3 figures may be subject to adjustment pending further review and assessment of the carbon emissions produced within the business.

Current Emissions Reporting

Reporting Year: FY22	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	1,389.42
Scope 2	2.29
Scope 1 & 2 Sub-total	1,391.71 tCO ₂ e (Scope 1 & 2 only)
Scope 3 ¹ (Included Sources)	773.50* Included sources: <ul style="list-style-type: none"> • Category 4: Upstream transportation & distribution – 1.95 tCO₂e • Category 5: Waste generated in operations – 134.82 tCO₂e • Category 6: Business Travel – 13.12 tCO₂e • Category 7: Employee commuting – 212.50 tCO₂e • Category 9: Downstream transportation & distribution – 411.11 tCO₂e
Total Emissions	2,165.21 tCO₂e (Scope 1, 2 & 3)

*excludes Scope 3 related to sister company Fannin (UK) Limited, reported separately.

Emissions reduction targets

Objectives & Targets

Aligned with our parent company DCC plc, DCC Vital has set the target to reduce our Scope 1,2 and 3 carbon emissions to net zero by 2045 with the following interim reductions against a 2019 baseline:

- **20% reduction in Scope 1 and 2 emissions by 2025 and**
- **50% in Scope 1 and 2 emissions by 2030.**

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented at DCC Vital sites since the FY19 baseline and the measures will be in effect when performing awarded contracts.

- Conversion of electricity to 100% renewable sources
- Implementation and use of LED lighting across all sites
- Implementation of EV charging points where feasible and secure to do so
- Implementation of Zero to Landfill at the Measham facility
- Introduction of hybrid working policy where feasible to do so
- Environmental Impact Assessments completed.
- ISO14001 certification of the Cumbernauld facilities
- Inclusion of Sustainability targets in performance management process for Senior management
- Measurement of Scope 3 carbon emissions baseline for Categories 4, 5, 6, 7 and 9.

The carbon emission reduction achieved by TPS Healthcare through the conversion to electricity from renewable sources equates to a 98% reduction in Scope 2 emissions from 100.36 tCO₂e in FY19 to 2.29 tCO₂e in FY23.

Further Carbon Reduction Initiatives

In future, we will continue to implement measures to reduce carbon emissions such as:

- Introduction of Carbon Reduction plans
- Update of Waste Impact Assessments & expansion of Zero to Landfill programmes
- Development of electric vehicle fleet policy
- Evaluation of alternative energy and fuel sources (e.g. biofuels, solar energy)
- Extension of ISO 14001 certification to include our Measham facility
- Improved insulation of the warehouse roofs at Napier Place and Tollpark Road
- Measurement of all relevant Scope 3 carbon emissions sources
- Engaging with our supply chain partners to review their approaches to carbon reduction and sustainability and to develop reduction targets for Scope 3 carbon emissions

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard² and uses the appropriate Government emission conversion factors for greenhouse gas company reporting³.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard⁴.

This Carbon Reduction Plan has been reviewed and signed off by the management team of TPS Healthcare.

Signed on behalf of the Supplier:

Chris Soanes
