

# ENVIRONMENTAL POLICY STATEMENT

DCC Vital will ensure that all business operations protect the environment in the communities we serve and minimise any potential adverse impact across the value chain, including biodiversity, habitats and ecosystems. We will operate in compliance with all relevant environmental legislation and will strive to implement pollution prevention and environmental best practice.

DCC Vital's Management teams are responsible for implementation of this policy within each business with the support of all employees.

Protecting our environment is good business. We are committed to continually improving our environmental performance through careful management of our operations.

DCC Vital Leadership Team, September 2024

*Please see Appendix for the list of DCC Vital businesses covered by this policy.*

# ENVIRONMENTAL EXPECTATIONS

- Integrate the consideration of environmental aspects and impacts into all decision making and activities such as procurement, business operations and waste management.
- Continually monitor environmental performance and periodically review this environmental policy and our plans to drive improvements.

- Train, educate, and inform employees about environmental issues that may affect their work.

- Implement Reduce, Re-Use and Recycling programmes.
- Promote efficient use of materials and energy resources throughout the business, including water, electricity, fuel, oil, raw materials and other resources, particularly those that are non-renewable.
- Purchase and use environmentally responsible products, including end of life where possible.
- Measure and monitor energy use and carbon emissions within our operations and target reductions through energy efficiency measures.

- Communicate our environmental commitment to customers, stakeholders and the public, and encourage them to support it.
- Promote and advocate for our more sustainable products and services wherever possible.

- Where possible, avoid unnecessary use of hazardous materials, substances and products. Seek substitutions when feasible and take all reasonable steps to protect human health and the environment when such materials must be used, stored and disposed of.
- Where required by legislation or where significant health, safety or environmental hazards exist, develop and maintain appropriate emergency and spill response programmes.
- Ensure management of wastewater is compliant with local regulations.

# APPENDIX

DCC Vital businesses include the following:
